

# Quick Reference Guide

As of May 16, 2021

Fast Play® offers an exciting way to play from the Illinois Lottery! The games are quick and easy draw games that are available for purchase through the Photon terminal or a Win30. There are no numbers to pick, no play slips to complete, no scratching, and no waiting. All prizes are immediately replenished after they are won, so players can win any prize at any time from any Illinois Lottery retailer.

## How to Play Fast Play

- Players simply purchase their Fast Play game of choice and follow the How to Win instructions on the game ticket.
  - » Players can choose from the selection of Fast Play games available through the Photon terminal and Win30.
  - » Fast Play games feature three types of prize structures: set (i.e., jackpot is predetermined), progressive (i.e., rolling jackpots), and progressive suite (i.e., rolling jackpots with wager options for a percentage of one jackpot).
  - » Each game has an individual prize structure, and a top prize or progressive top prize.
  - » In a progressive Fast Play game, the jackpot begins at a set minimum and grows with each ticket sold statewide until someone wins.
  - » A progressive suite game is just like a progressive game, but the difference is that players pick a wager for a percentage of the linked jackpot. The higher the wager, the higher the percentage that can be won.
  - » Fast Play games do not require players to select numbers or fill out a play slip.
- Fast Play tickets will print with only one game per ticket.
- Players should follow the HOW TO WIN instructions on the ticket to see if they have a winning ticket. To verify, players can scan the barcode at the bottom of the ticket on the ticket scanner in retail locations or on the Illinois Lottery app.
- Winning tickets must be claimed within one year from the date of purchase.
