

LOTTERY INVESTMENTS

Certain Lottery prizes awarded are payable to the winners in annual installments ranging from 19 years to life of the prize winners, with the first payment being made at the time of the drawing. Effective July 30, 1985, the law provides that the State Treasurer may, with consent of the Director; contract to invest in securities which provide payments corresponding to the Department's obligations to these winners.

Money may be invested only in bonds, notes, certificates of indebtedness, treasury bills, or other securities constituting direct obligations of the United States of America and all securities or obligations the prompt payment of principal and interest of which is guaranteed by a pledge of the full faith and credit of the United States of America.

January 31, 2017	Fair Value
PNC	<u>\$ 292,733,717</u>
Total	\$ 292,733,717

Interest Rate Percentages:

Minimum interest rate	1.806%
Maximum interest rate	7.741%

Investment Income and Average Yield Rate:

Investment Income	\$ 794,163
Average Yield Rate	3.505%

Monthly investment income and the average yield rate is an "effective" income amount and yield rate. There is no cash realization of interest income by the Lottery Department. The yield rate is computed by dividing the effective investment income for the month by the average present value of the investments for the month.

(5) Investments and Prizes Payable in Installments

For an investment, custodial credit risk is the risk that, in the event of the failure of the counterparty, the Department will not be able to recover the value of its investments that are in the possession of an outside party. Investments are held by the custodial bank's trust department in the name of the State Treasurer.

Interest rate risk is the risk that an investment's fair value decreases as market interest rates increase. Typically, this risk is higher in debt securities with longer maturities. The Department purchases investments with maturities scheduled to coincide with cash requirements. Interest rate risk is managed according to the purpose of the investments and the projected time frame for the use of these assets.

The risk that the Department will actually realize material losses from its investments in government securities resulting from changes in market interest rates is mitigated by the low probability that these securities will have to be sold prior to maturity.

The fair value of the securities is reflected in the accompanying financial statements of the Deferred Prize Winners Trust Fund as assets and as reserved fund equity. The original cost of the securities plus accrued interest is \$20,437,024.56 more than fair value as of January 31, 2017. These securities were purchased at discount rates ranging from 1.806% to 7.741% and mature in annual installments over a period of 25 years.

Investments in prize securities are in the form of United States Treasury zero-coupon bonds. Investments are held by a custody bank in the name of the State Treasurer. Credit ratings are not required for U.S. Government and agency securities that are explicitly guaranteed by the U.S. government. The fair value and investment maturities of the investments at January 31, 2017 are as follows:

Investment Maturities (In Years)	Fair Value Amount
Less than 1 year	\$ 26,989,352
1 to 5 years	86,772,959
6 to 10 years	89,051,211
More than 10 years	<u>89,920,195</u>
Total	<u>\$292,733,717</u>

The Department has an unconditional obligation to pay all grand prizewinners the future value of the prize. The fair value of the future prize payments, which is reported in the Deferred Prize Winners Trust Fund, follows:

	Current	Long-Term	Total
<u>For the Fiscal Year:</u>			
2016-2017	\$27,679,667	\$ -	\$ 27,122,667
2017-2018		22,760,667	22,426,667
2018-2019		22,486,667	22,542,667
2019-2020		24,931,667	22,190,667
2020-2021		22,046,667	24,539,667
2021-2026		106,845,001	106,314,001
2026-2031		81,472,000	82,240,000
2031-2036		48,744,000	46,530,000
2036-2041		3,947,000	6,701,000
2041-2045		481,000	787,000
Total Future Prize Payments	27,679,667	333,714,669	361,394,336
Less Present Value Adjustments	2,338,203	86,759,440	89,097,643
Present Value of Future Prize Payments	25,341,464	246,955,229	272,296,693
Add Adjustment to Reflect Fair Value	1,647,888	18,789,136	20,437,024
Fair Value of Future Prize Payments as of January 31, 2017	\$26,989,352	\$265,744,365	\$292,733,717

8. Investments and Prizes Payable in Installments

Prior to July 30, 1985, certain prizes awarded were payable to the winners in annual installments ranging from 10 years to life of the prize winners, with the first payment being made at the time of the drawing. The Department entered into agreements with insurance companies under which the Department purchased annuities under group contracts that provide payments corresponding to the Department's obligation to these winners.

Interest rate risk is the risk that an investment's fair value decreases as market interest rates increase. Typically, this risk is higher in debt securities with longer maturities. The Department purchases investments with maturities scheduled to coincide with cash requirements. Interest rate risk is managed according to the purpose of the investments and the projected time frame for the use of these assets.

The investment in prize annuities are subject to fluctuations in fair value due to interest rate risk, but these annuities are held to maturity to satisfy the annual installment obligations to prize winners. The fair value at maturity is the face value of the annuity, regardless of the fluctuations in value during the time period that the investments are outstanding.

As required by generally accepted governmental accounting principles, the present value of the annuities and the present value of the related liabilities have been reported in the financial statements for those annuities which were purchased in the name of the Department and which the Department has retained the rights of ownership. The Department would be liable for future payments if the insurance companies were to default on their payments. The investments in annuities have a weighted average maturity of 3.49 years. The present value of future prize payments, which is reported in the State Lottery Fund, follows:

	Current	Long-Term	Total
<u>For the Fiscal Year</u>			
2016-2017	\$62,000	\$ -	62,000
2017-2018		62,000	62,000
2018-2019		62,000	62,000
2019-2020		62,000	62,000
2020-2021		50,000	50,000
2021-2026		50,000	50,000
Total Future Prize Payments	62,000	286,000	348,000
Less: Present Value Adjustments	1,559	26,707	28,266
Present Value of Future Prize Payments as of January 31, 2017	<u>\$60,441</u>	<u>\$259,293</u>	<u>\$319,734</u>
